G4-CONNECT
Getting Started Guide

# G4 CONNECT GETTING STARTED

ANDROID VERSION ONLY - AVAILABLE FROM GOOGLE PLAY at

https://play.google.com/store/apps/details?id=com.gatekeeper_systems.mdvr.direct

G4 Connect is custom software with which to connect to Gatekeeper Systems range of Hybrid MDVR's using a G4 Connect WiFi dongle. With G4 Connect you can Playback previously recorded video; Configure the MDVR; Export video for viewing later even on a different system.

**Please Note:** For G4 Connect to function there is a specific order for the G4 Connect WiFi dongle/SD card combination.

Insert the SD card into the SD card slot on the Gatekeeper Systems G4 Connect WiFi dongle. With the MDVR powered up insert the USB connector in to the USB port of the MDVR. If using the Gatekeeper Systems G4 Connect WiFi dongle with a Gatekeeper Systems USB HUB make sure to follow the connection instructions on the Gatekeeper Systems USB HUB.

Currently, Mirror and Sub-Stream Exporting are not supported.

Go to Google Play Store and search for G4 Connect or enter the following web address: https://play.google.com/store/apps/details?id=com.gatekeeper_systems.mdvr.direct download and install.

Connect the Gatekeeper Systems G4 Connect WiFi dongle to the MDVR

Open G4 Connect. You will be presented with a login screen. By default the User Name and Password are admin.

Click the Search button, top right hand corner, This will force G4 Connect to search for all currently connected Gatekeeper Systems MDVR's.

Select the DVR which you wish to View / Export Video from.

Enter the User name and Password and click Login.

When G4 Connect first opens it will default to the Common, Basic Info screen.

Other options can be accessed from here, including Preview; Playback (including Export) and Preferences.
